1. Although the applicant is only given one month to respond to the election requirement, the following problems are pointed out in order to promote compact prosecution. In claim 57, "the optical switching matrix" lacks antecedent basis. In the drawings, there are no means to provide the filtering and amplifying of claims 6-7, 17-18, 29-30, 41-42 and 55-56. Further, in these claims, it is unclear what the "optical receiver" does. Does it receive an optical signal and transmit it optically? It appears that the transmitter also receives an optical signal and transmits it optically? Are they really repeaters or amplifiers? These issues will be brought up in the next office action, if not corrected (yet the applicant does not have to correct them due to the one month time limit).

2. This application contains claims directed to the following patentably distinct species:

Species I) figure 6

Species II) figure 7

Species III) figure 8

The species are independent or distinct because the embodiments are patentably distinct.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-2, 4-5, 8-10, 22 (since crossbar is claimed generically), 25-27, 31-32, 45-50, 53, 57-62 and 67 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.
MPEP § 809.02(a).
